# CONTENTS

## 1 EDITOR'S NOTE

A thoughtful opening note setting the tone of AURA — where design, celebration, space, and emotion come together through a shared vision of beauty, intention, and craft.

## 2 FOUNDERS' PAGES

An intimate glimpse into the minds behind Vasterior and PS Décor, sharing their philosophy, journey, and the deeper intent that shapes every space and celebration.

## 3 ABOUT VASTERIOR

An introduction to Vasterior — a design studio rooted in spatial intelligence, luxury interiors, and purposeful planning, where aesthetics meet alignment and intention shapes form.

## 4 ABOUT MAHAVASTU

A contemporary perspective on MahaVastu — the science of spatial alignment, energy balance, and non-destructive corrections that support clarity, prosperity, and well-being in modern living.

## 5 VASTERIOR SERVICES

A detailed overview of Vasterior's offerings — interior design, spatial planning, MahaVastu consultation, execution management, and bespoke solutions crafted for homes, offices, and boutique spaces.

## 6 TS INFORMATIVES

A behind-the-scenes narrative of a functional yet refined workspace, where planning, material intelligence, and spatial clarity define a modern professional environment.

## 7 STUDIO APARTMENT

A compact luxury residence crafted with precision — balancing comfort, aesthetics, and intelligent space planning to create calm, everyday living with character.

## 8 OFFICE STUDIO

A modern studio environment designed for focus, flow, and flexibility — reflecting how thoughtful interiors can elevate work culture and productivity.

# EDITORIAL

There are years that pass quietly... and then there are years that shape you. This one, for Vasterior Studio, has been a season of bold ideas, meticulous artistry, and stories unfolding through spaces, some carefully built from scratch, some thoughtfully restored, and some celebrated under open skies where architecture meets life itself.

As we present this annual edition, we invite you to step into a world where design intersects deeply with emotion, where every intention holds equal weight to every aesthetic choice, and where every space, whether it is a private residence, a corporate environment, or a public area, becomes a living narrative in its own right.

The heart of this magazine is a shared belief: spaces are not merely created; they are authored with care, insight, and an understanding of human experience that transcends visual appeal alone.

For Vasterior Studio, this year has been about depth, exploration, and a constant curiosity about how spaces influence the people who inhabit them. About looking at a room, a home, or an office not just for its form or its materiality, but for the subtle energies, the flows, and the atmospheres that allow families, teams, and individuals to thrive. From boardrooms thoughtfully reinvented with layered lighting, rich textures, and material confidence, to residences gently aligned to planetary strengths and designed for mindfulness, the studio has continued to shape spaces that offer clarity, belonging, and a quiet, enduring sense of luxury.

These projects tell stories of their own: of clients discovering comfort in a home that finally breathes with them, of leaders stepping into offices that reflect both ambition and ethos, and of families seeking harmony and resonance through the considered alignment of spaces according to Vastu principles. Every wall, every corner, every detail carries intention, and in these careful gestures, spaces transform from static environments into living companions for those within them.

Inside these pages, you will find some of our most defining works of the year. An MD cabin transformed into a sanctuary of leather, stone, and mindful geometry; a Vastu-aligned residence where the subtle interplay of light and materials changed the very energy of the home; meticulously executed office renovations that balance luxurious finishes with functional utility; private spaces designed for reflection, creativity, and belonging; and many other projects that collectively embody the studio's philosophy, its care for clients, and its commitment to design that is thoughtful, intentional, and profoundly human.

Each project is a reminder that beauty is never accidental. It is deliberate, emotional, and deeply personal, shaped through a combination of insight, expertise, and a genuine understanding of the lives it will host. We hope that in every layout, every photograph, and every editorial note, you sense this care, this thoughtfulness, and this dedication to spaces that do more than simply exist—they resonate, inspire, and sustain.

As we move forward, our vision remains at once grounded and expansive. We carry with us the knowledge that design, whether for private homes, corporate environments, or transformative public spaces, is ultimately about people: about what they seek, what they feel, and the stories they hope to live within the walls that surround them.

With this edition, we honor the trust placed in us by our clients and collaborators, and we reaffirm our commitment to creating spaces that linger in memory, spaces that inspire, and spaces that embody clarity, harmony, and quiet elegance long after the lights dim or the day concludes.

Thank you for turning these pages with us, for joining us on this journey, and for witnessing the continued evolution of Vasterior Studio. Here's to another year of thoughtfully crafted spaces, stories that endure, and collaborations that flourish with intention, care, and a shared love for design that is as meaningful as it is beautiful.

Warmly,

Vasterior Studio

# Chitresh Jain

Interior Designer | MahaVastu Expert | Co-Founder, Vasterior

Raised in Hyderabad and rooted in the quiet power of design, Chitresh Jain represents a rare blend of technical precision, spiritual sensitivity, and instinctive aesthetic intelligence. His journey began long before Vasterior took shape, in the corridors of his family's tile and stone business, where textures, materials, and craftsmanship shaped his earliest memories of space.

A Hyderabad boy through and through, Chitresh completed his schooling and BBA graduation there, carrying forward a deep appreciation for culture, structure, and disciplined work ethics. Soon after, he stepped into the family business ecosystem, gaining hands-on experience in tiles, stones, and later, the manufacturing of packaging materials and corrugated cardboard. These early chapters gave him a tactile understanding of materials, something that continues to define his design language today.

But his true calling emerged at the intersection of art, energy, and functionality.

Driven by curiosity, Chitresh began journey in spatial designing and became a certified interior designer. Along with learning the theories of spatial alignment and planning, he also learned design tools like AutoCAD and gradually immersed himself in the science of spatial energy. What started as exploration soon turned into mastery, as he trained rigorously in Vastu Shastra and ultimately evolved into a certified MahaVastu expert. Over time, he developed a keen ability to read the subtle energy flow of spaces, understanding how direction, activity, objects, and intention shape human experience.

In 2023, this vision found its home in Vasterior, co-founded with his college friend and creative collaborator

Charu Shukla. Together, they built a design philosophy rooted in a simple belief:

A space should not only look beautiful, it should feel aligned, effortless, and alive.

As the Founder and Spatial Flow Consultant at Vasterior, Chitresh bridges:

- Design & Direction
- Materiality & Energy
- Luxury Aesthetics & Vastu Logic

His work is defined by warm, intentional spaces that honour both craftsmanship and consciousness.

From intricate residential transformations to boutique commercial spaces, and from energy mapping to client mentoring, Chitresh approaches each project with an artist's heart and an engineer's discipline. His clients describe him as intuitive, meticulous, and quietly visionary, someone who can read both the blueprint and the energy blueprint of a home.

Today, Vasterior stands as a growing design studio powered by his philosophy:

Design is more than just decoration; it is alignment, clarity, and emotional grounding.

And at the heart of it is Chitresh: a designer shaped by heritage, a MahaVastu expert shaped by discipline, and a founder shaped by the belief that spaces can transform lives when they are crafted with intention.

# Charu Shukla

**Co-Founder, Vasterior |  
Co-Founder, PS Décor  
Interior Designer |  
Luxury Wedding Creative Director**

Born and raised in Moradabad, Charu Shukla has always carried an instinct for aesthetics, organisation, and large-scale celebrations. Her journey began in the quiet discipline of St. Mary's Convent School, where she developed both her cultural sensitivity and her ability to bring people together. She later moved to Delhi to pursue her B.Com at Delhi University, and it was here that her talent for events first found its stage.

Whether it was managing youth festivals, coordinating campus celebrations, or shaping the cultural narrative of her college, Charu's leadership stood out early. By the end of graduation, she was elected Vice-President of Commsoc, her college's commerce department, a role that refined her skills in creative direction, leadership, and people management. After completing her bachelor's degree, she did her MBA in marketing.

But Charu's real education came outside the classroom. Guided by intuition more than convention, she joined an event management institute, realising she wanted real, hands-on experience, not just theoretical training. Along with her course, she joined a leading wedding management company and learned on-ground, learning every detail of the industry, from timelines and décor to family dynamics and venue operations.

In 2021, Charu and Rounak Shukla (Charu's then friends and now husband) built something deeply personal: PS Décor.

A luxury wedding management company born from passion, precision, and a shared dream of creating celebrations that feel both grand and intimate. In collaboration

with her earlier venture, Shuchi Events, Charu carved a niche in ultra-luxury, emotionally personalised weddings, earning recognition for her ability to turn ideas into immersive experiences.

Her creative eye, hospitality-driven approach, and instinct for storytelling quickly became the backbone of PS Décor's signature style, refined themes, detail-rich installations, and celebrations designed with heart.

Yet Charu's creative curiosity didn't stop there.

Drawn toward interiors and the deeper psychology of space, she pursued an Interior Designing course, further expanding her design language and visual vocabulary. In 2024, she co-founded Vasterior with MahaVastu expert Chitresh Jain, a studio built on the belief that spaces, like events, can shape emotions, behaviours, and the energy of those who live within them.

At Vasterior, Charu blends her event design sensibility; mood, texture, colour harmony, human experience, with the intentionality of interior design. Together, she and Chitresh create luxury spaces that combine aesthetics with alignment, intuition with structure, form with feeling. Today, across both PS Décor and Vasterior, Charu stands as a creative force; a designer, storyteller, manager, and visionary; shaping not just events or interiors, but experiences that stay with people long after they leave the room.

SPATIAL FLOW

# VASTERIOR

**“INTERIOR DESIGN • MAHAVASTU • SPATIAL FLOW”**

---

Vasterior — Where Space, Direction & Design Align

# ABOUT VASTERIOR

Spatial Flow. Intention. Timeless Design.

There are design studios that create beautiful spaces, and then there is Vasterior — a place where design is not merely seen, but deeply felt. Where every project begins not with colours, finishes, or materials, but with a single, grounding question that shapes the soul of the space: How should this place make you feel the moment you walk in?

Born from the belief that spaces carry energy, memory, and emotional resonance, Vasterior stands at the rare intersection of ultra-luxury interior design and the ancient, precise science of MahaVastu. It is a studio where intuition meets intelligence, where beauty meets geometry, and where modern living aligns seamlessly with timeless spiritual wisdom.

At its core, Vasterior is far more than an interior design practice. It is a philosophy of living well — of inhabiting spaces that nourish you, expand you, and hold you gently through the various chapters of life. Every environment is treated as an extension of the people who occupy it, responding to their aspirations, rhythms, and emotional needs.

Guiding this philosophy is Chitresh Jain, a designer whose lens blends architectural sensitivity, material mastery, and a profound understanding of energy. His vision is supported by a team that approaches every site as a living organism — one with a pulse, a mood, and a destiny waiting to be shaped. To them, a home is not a structure. An office is not a workplace. Every space is a story, and every story deserves intention and thoughtful authorship.

This intention is visible in Vasterior's signature aesthetic: quiet luxury, tactile warmth, soft geometry, curated earth tones, natural materials, and the poetic dance of light and shade. Yet beneath this visual harmony lies something deeper — spatial flow. The science of aligning the physical layout, the emotional purpose, and the energetic blueprint of a space so that life can unfold effortlessly within it.

Every Vasterior project — be it a luxury residence, a boutique office, a studio apartment, or a complex renovation — is rooted in the principles of clarity, balance, grounding, and emotional rhythm. The team doesn't decorate; they decode. They do not apply Vastu as an afterthought; they weave MahaVastu into the very first line drawn on the layout.

By mapping the sixteen directional zones, understanding elemental interplay, harmonising activities, and aligning emotional frequencies, Vasterior creates environments that don't just look aligned — they feel aligned. You sense it in your breath, your clarity, your productivity, your relationships, and in the way your day begins to flow with ease.

This year's edition of the magazine showcases some of Vasterior's most defining work: boardrooms transformed into sanctuaries of focus, homes rediscovering their forgotten calm, cabins infused with quiet authority and ease, and spaces where materiality, proportion, and energy come together with effortless grace.

Each project echoes one timeless promise:  
to design with intention, to align with purpose, and to create spaces that stay with you long after you step out of them.

Vasterior is not merely shaping interiors. It is shaping experiences. Shaping energies. Shaping the way people live, feel, and move through their everyday worlds.

# MAHAVASTU

## The Intelligence Of Space

At its essence, Vastu is the ancient Indian science of spatial intelligence — a sophisticated system developed to align built environments with the rhythms of nature. It studies how light, direction, elements, movement, and human activity interact within a space, shaping not only how a place looks, but how it functions, feels, and supports life within it. When thoughtfully applied, Vastu supports clarity, balance, well-being, and prosperity — not as belief or superstition, but as observation refined over centuries of lived experience.

Vastu emerged from a deep understanding of nature's forces and their relationship with human behaviour. It recognises that space is never neutral. Every direction carries a quality, every element holds influence, and every activity interacts with its environment in measurable ways. When these forces are aligned, spaces feel effortless. When they are ignored, friction quietly builds — emotionally, mentally, and physically.

Over time, as architecture evolved and lifestyles modernised, the need for a more adaptable and non-disruptive framework became clear. Dense cities, vertical living, contemporary materials, and complex layouts required an approach that honoured classical wisdom while responding to present realities. This evolution gave rise to MahaVastu — a contemporary, research-backed interpretation of traditional Vastu principles.

Rooted in thousands of documented case studies, MahaVastu simplifies spatial alignment into clear, actionable principles based on Direction, Element, Activity, and Object. Rather than demanding demolition or drastic reconstruction, it focuses on intelligent corrections that work with the existing structure. Subtle adjustments in layout, placement, material choice, and spatial use allow energy to rebalance without disruption to daily life.

What truly sets MahaVastu apart is its relevance to modern living. It respects contemporary architecture, design aesthetics, and urban constraints while offering solutions that operate quietly in the background. Instead of rigid rules, it provides a flexible language of alignment — one that adapts to the people who inhabit the space, their intentions, and their evolving needs.

MahaVastu acknowledges that no two spaces, or lives, are identical. A home functions differently from an office. A creative studio carries a different rhythm than a family residence. By understanding the purpose of a space and the emotional intent behind it, MahaVastu allows alignment to be personal rather than prescriptive.

Together, Vastu and MahaVastu offer a holistic understanding of how environments influence mood, health, productivity, decision-making, and relationships. They remind us that space is not static. It is responsive. It listens. It remembers. And when designed with intention, it supports us in ways that are both subtle and profoundly transformative.

In today's world of fast design, instant aesthetics, and fleeting trends, these sciences offer something increasingly rare — timeless intelligence. A way of creating spaces that are visually refined yet emotionally grounding, contemporary yet deeply rooted, and energetically coherent without ever announcing their presence. Spaces that do not overwhelm, but quietly support. Spaces that do not impress momentarily, but endure meaningfully over time.

OFFICE RENOVATION

## TS INFOMATICS- THE INFOMATICS COLLECTIVE

**PROJECT:** Interior office renovation

**TYPE:** Office

**AREA:** 550 SQ. FT

**YEAR:** 2025

The design vision for TS Infomatic's office transforms simplicity into sophistication, where a refined neutral palette, functional furniture, and restrained décor converge to create a workspace that embodies clarity, efficiency, and timeless elegance.

## ABOUT TS INFOMATIC

TS Informatics Private Limited is an engineering company that blends creative excellence with technology innovation to deliver impactful customer experiences. With expertise in RFID, automation, sensors, robotics, and experiential technologies, we provide end-to-end solutions across events, conferences, access control, and smart learning environments.

Our proven capabilities span digital customer engagement, centralized event management for MICE, resource tracking, visitor management, and real-time monitoring through GPS and GPRS. In the education sector, our transformative zEYE platform brings 21st-century learning, campus security, and operational automation to schools across India through a one-card strategy. Having successfully delivered 50+ technology implementation projects, we continue to redefine engagement, security, and efficiency with innovative, reliable, and cost-effective solutions.

## WHY VASTERIOR?

TS Informatics Private Limited is an engineering company that blends creative excellence with technology innovation to deliver impactful customer experiences. With expertise in RFID, automation, sensors, robotics, and experiential technologies, we provide end-to-end solutions across events, conferences, access control, and smart learning environments.

Our proven capabilities span digital customer engagement, centralized event management for MICE, resource tracking, visitor management, and real-time monitoring through GPS and GPRS. In the education sector, our transformative zEYE platform brings 21st-century learning, campus security, and operational automation to schools across India through a one-card strategy. Having successfully delivered 50+ technology implementation projects, we continue to redefine engagement, security, and efficiency with innovative, reliable, and cost-effective solutions.

## / BRIEF

### OBJECTIVE

The renovation project aspires to transform the workspace into a timeless and highly functional office environment that fosters pride, creativity, and comfort for employees, while optimizing productivity within a modern yet enduringly classic setting.

### CLIENT'S REQUIREMENT

- Dedicated space for the client's partner.
- Clear, open circulation for free movement.
- Ample storage solutions.
- Area to address/speak to the entire team.
- Vaastu and astrology-compliant layout.
- Timeless design (avoid short-lived trends).
- Recreational area
- Accommodation for freelancers, CA, auditors, and visitors.
- Creative/fun layout.
- Increased seating capacity for employees.
- Service area.
- Testing area.
- Utility-based workstation layout.

### STYLE

The renovated office embodies a modern, functional, and emotionally grounded design style that harmoniously blends contemporary aesthetics with traditional Vastu principles. The space feels open, efficient, and inviting — achieved through customized furniture, thoughtful spatial alignment, and an organic design process that evolved naturally. Subtle use of neutral tones, smart lighting, and well-planned acoustics enhance comfort and productivity, while traditional sensibilities, like retaining the client's cherished almirah, add warmth and personal character. The result is a workspace that balances modern sophistication with cultural depth — a reflection of efficiency, positivity, and emotional connection.

### USER

- Primary Users:
  - Client (owner)
  - Client's partner
  - Employees
- Secondary Users:
  - Freelancers / visitors
  - Chartered Accountant (CA)
  - Auditors
  - Other professional guests

## MOODBOARD

The moodboard embodies a modern and minimal design approach, characterized by clean lines, a refined earthy palette, and bold accent hues. Natural materials such as wood, stone, and greenery introduce warmth and texture, softening the sleek functionality of the space. The use of hexagonal patterns, seen across a variety of surfaces, adds a contemporary geometric element that reinforces visual interest without compromising simplicity. The result is a professional yet inviting atmosphere that enhances focus, comfort, and timeless sophistication within the office environment.

## MATERIAL BOARD

The moodboard embodies a modern and minimal design approach, characterized by clean lines, a refined earthy palette, and bold accent hues. Natural materials such as wood, stone, and greenery introduce warmth and texture, softening the sleek functionality of the space. The use of hexagonal patterns, seen across a variety of surfaces, adds a contemporary geometric element that reinforces visual interest without compromising simplicity. The result is a professional yet inviting atmosphere that enhances focus, comfort, and timeless sophistication within the office environment.

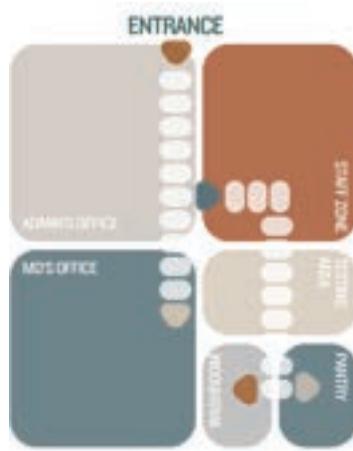

## ZONING

The circulation flow begins from the entry point into the Admin's Office, which acts as the first point of contact and transition. From here, movement extends directly into the Staff Zone, allowing quick access for employees, while side passages branch toward the Testing Area and Pantry, ensuring convenience and minimal disruption. The MD's Office is positioned adjacent yet slightly secluded, offering privacy while maintaining connectivity.

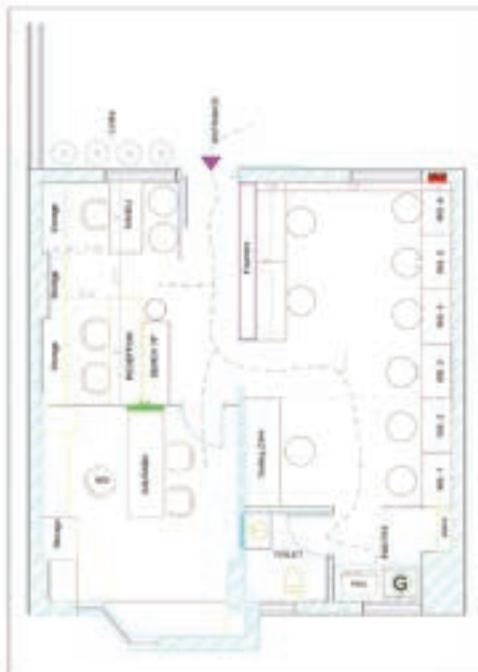

The Washroom is centrally located, making it easily accessible from all zones without interfering with work functions. This circulation ensures a logical, efficient, and user-friendly flow throughout the office.

## SPACE PLANNING

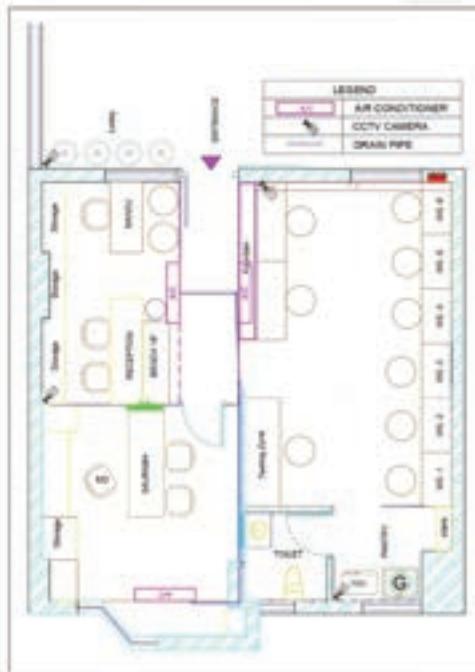

This office layout balances function and hierarchy with clear zoning. The Admin area at the entry manages visitor flow, while the MD Cabin is positioned privately for authority. The Staff Zone sits at the center, supported by a quieter Testing & Loft area for focused work. Pantry and Toilet are neatly placed for convenience, and circulation is designed to keep visitor and staff movement separate, making the space efficient, comfortable, and elegant.

## TECHNICAL DRAWINGS

**FURNITURE LAYOUT**

**CCTV AND HVAC**

**ELECTRICAL LAYOUT**

# ZONING

# THE FOUNTAIN

At the entrance of TS Infomatic Office, a beautifully designed wall fountain welcomes visitors with a sense of freshness and calm. It is crafted from Green Rainforest Marble, known for its rich green base interlaced with striking orange veins. These orange veins perfectly match the overall interior theme of the office, making the fountain not just a decorative element but a thoughtful design choice. As water gently flows over the polished marble surface, it highlights the natural patterns of the stone, creating a dynamic play of texture and movement. This combination of material and flowing water brings elegance, harmony, and a soothing ambiance to the workplace right from the entrance.

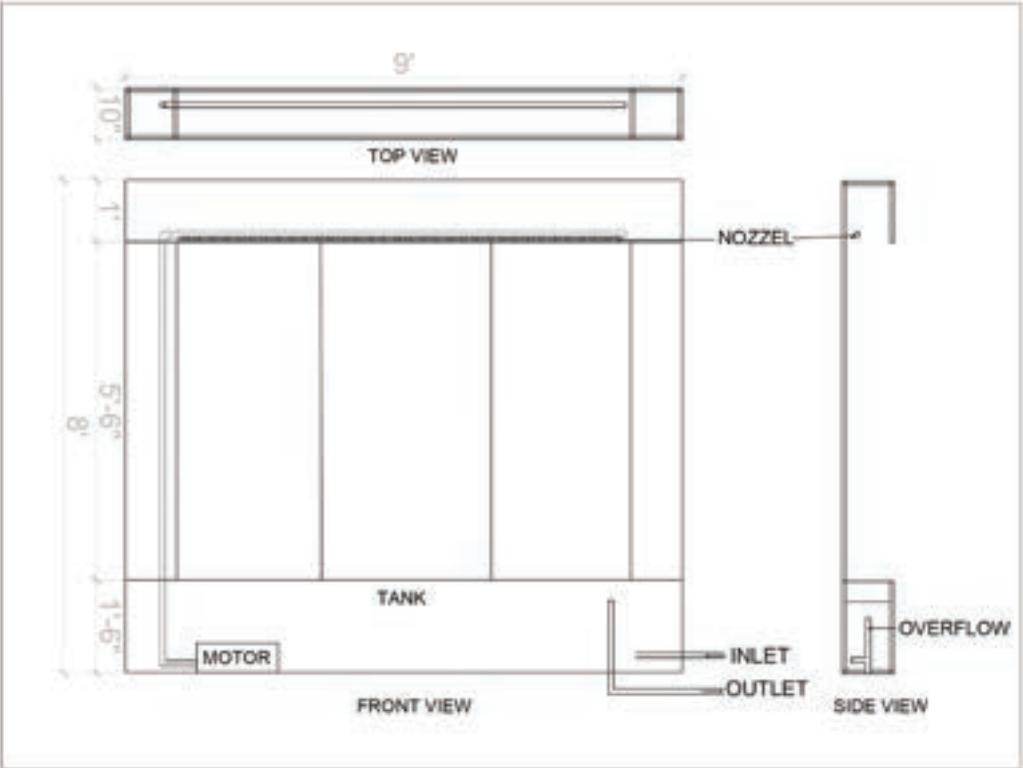

ORANGE VEINS

The design of the entrance fountain at TS Infomatic Office reflects a deep sense of detail and care. The Green Rainforest Marble was not only selected for its green base and orange veins that match the office theme, but also meticulously bookmatched to create a harmonious pattern. Out of four layout options, the one forming a subtle smile-like sign was chosen, symbolizing positivity and a welcoming gesture for everyone entering the office. This thoughtful approach makes the fountain more than just a decorative feature—it becomes a meaningful element that aligns aesthetics with emotion.

CHOSEN DESIGN: SMILE

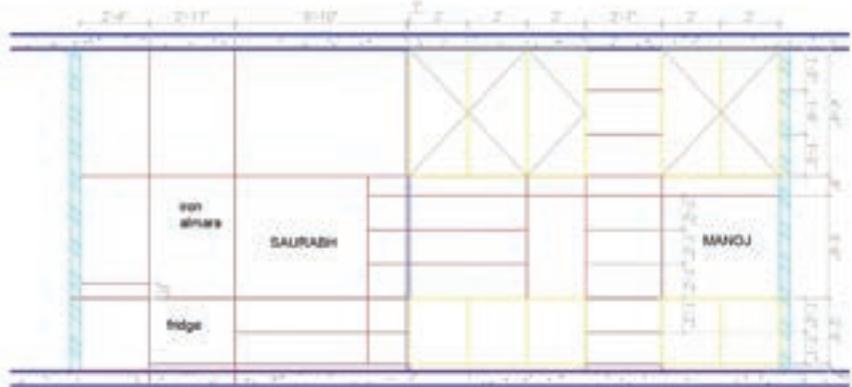

# THE FOUNTAIN: WORKING DRAWING

This working drawing shows the design and functioning of a wall-mounted fountain finished in Green Rainforest Marble. At the base, a concealed tank houses a motor pump that circulates water upward through hidden pipes. The water is released uniformly through a line of nozzles at the top, creating a smooth sheet that flows gently down the marble surface. The bold, natural veins of the Green Rainforest Marble come alive under the cascading water, giving the wall a dynamic, animated appearance. The tank is equipped with an inlet for filling, an outlet for draining, and an overflow provision for safety, ensuring smooth operation and easy maintenance. As the water continuously cycles from the tank to the top and back, the system combines technical efficiency with aesthetic elegance, transforming the solid stone wall into a luxurious and meditative focal point.

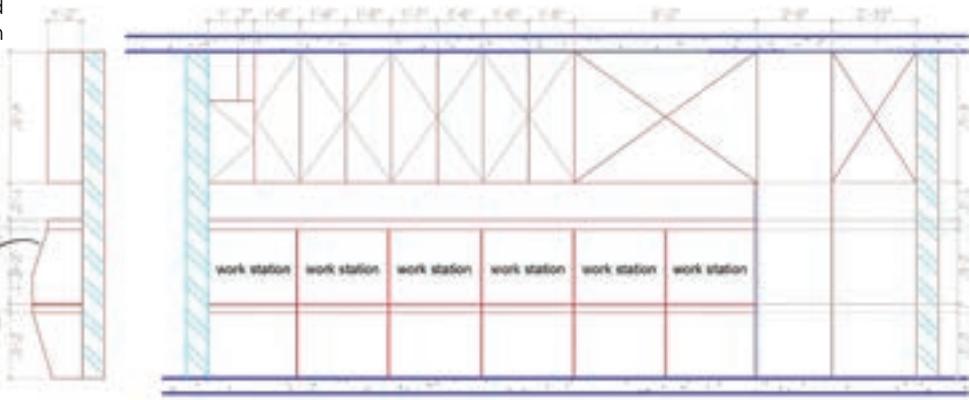

# ELEVATIONS

## ADMIN'S AREA

What may seem like a simple piece of furniture in the staff area is in fact the result of thoughtful design decisions. With the staff tables being only 3 feet wide, the partitions between them were cut at specific angles to provide additional leg space and enhance user comfort.

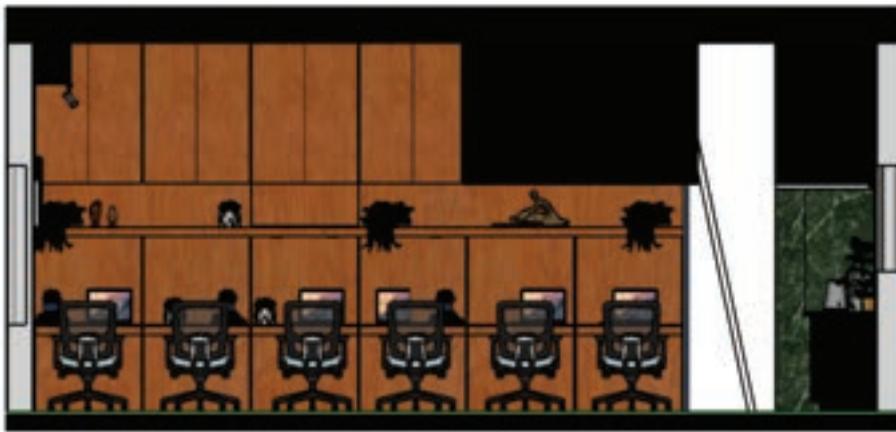

These angled cuts, apart from serving a functional purpose, also create a unique polygonal pattern that flows through the space, adding visual interest and reinforcing the office's modern design language.

## SECTION AA'

## SECTION BB'

### Engineering Precision, Elevating Performance

At Vasterior Studio, every workspace begins long before the first panel is cut or the first light is installed. It begins here — on the blueprint. For TS Informatics, a company built on clarity, computation, and operational excellence, our design approach demanded the same precision and intention that define their business.

The workstation blueprint is more than a technical drawing.

It is the genesis of flow — a quiet orchestration of ergonomics, energy alignment, movement, and human experience. Each line represents a choice. Each measurement, a moment of foresight. Each corner, a consideration for comfort. And each workstation, a promise of productivity balanced with calm.

Designed for People. Optimized for Performance.

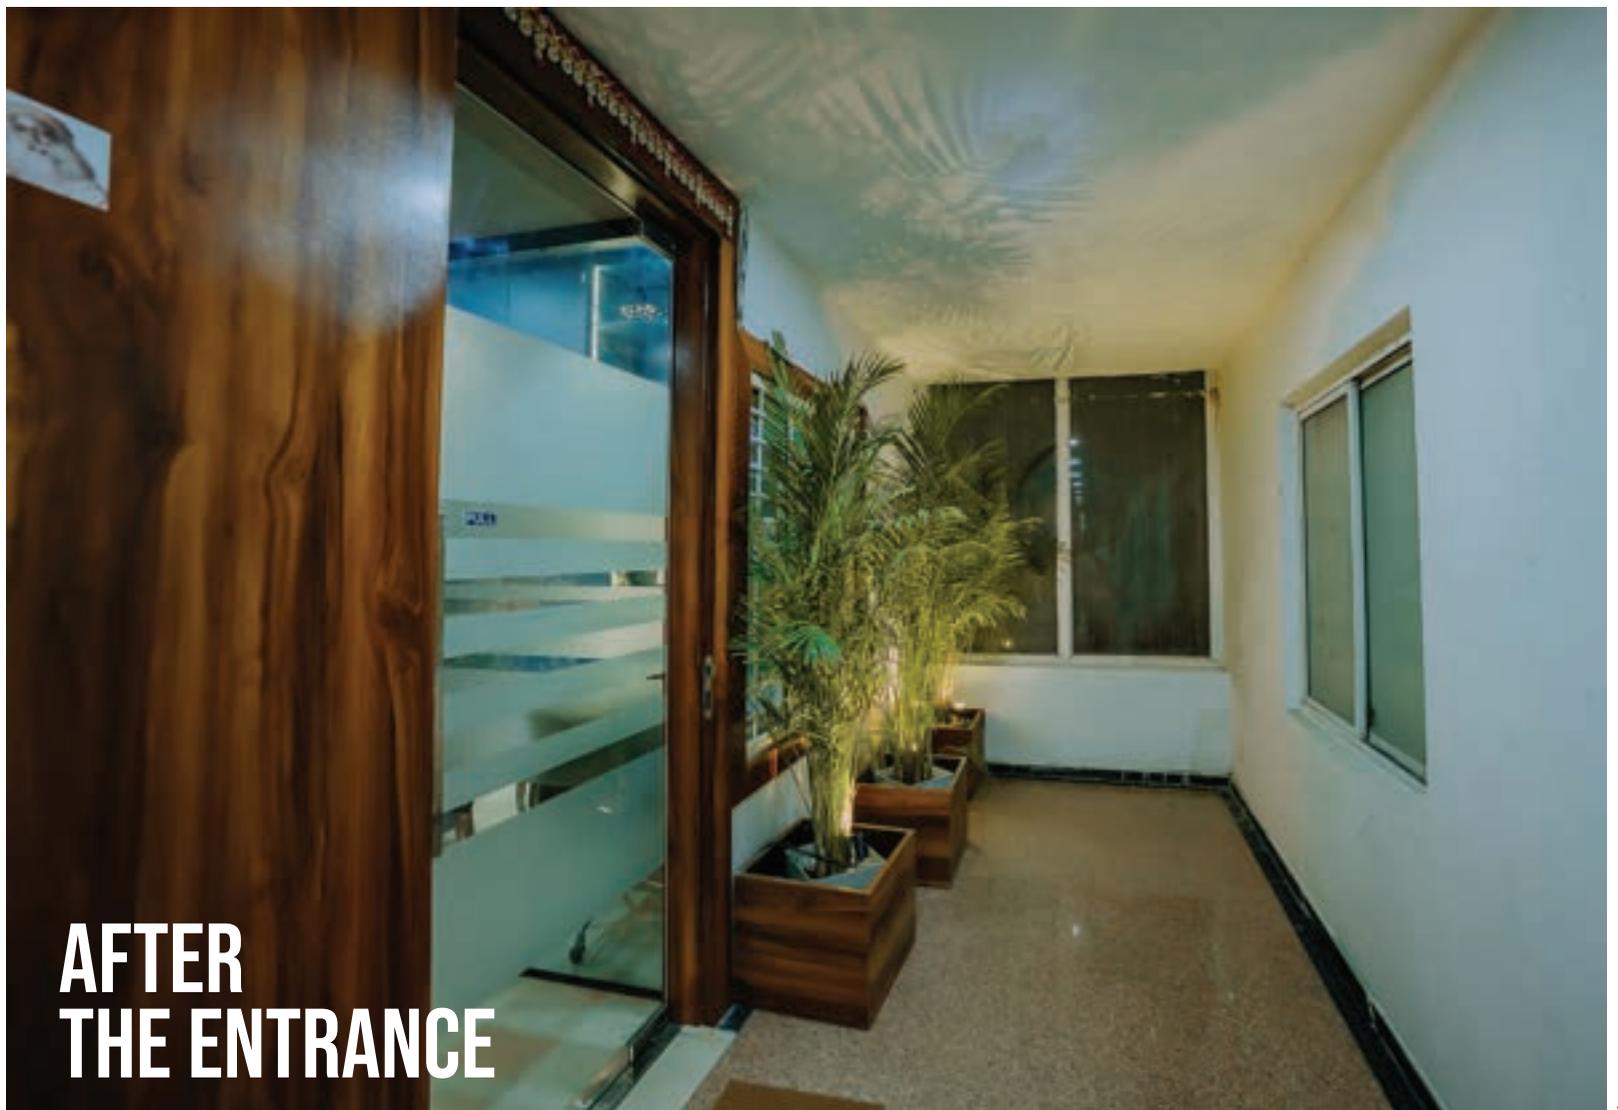

TS Informatics required a layout that could accommodate collaboration while protecting focused zones.

The resulting blueprint expresses:

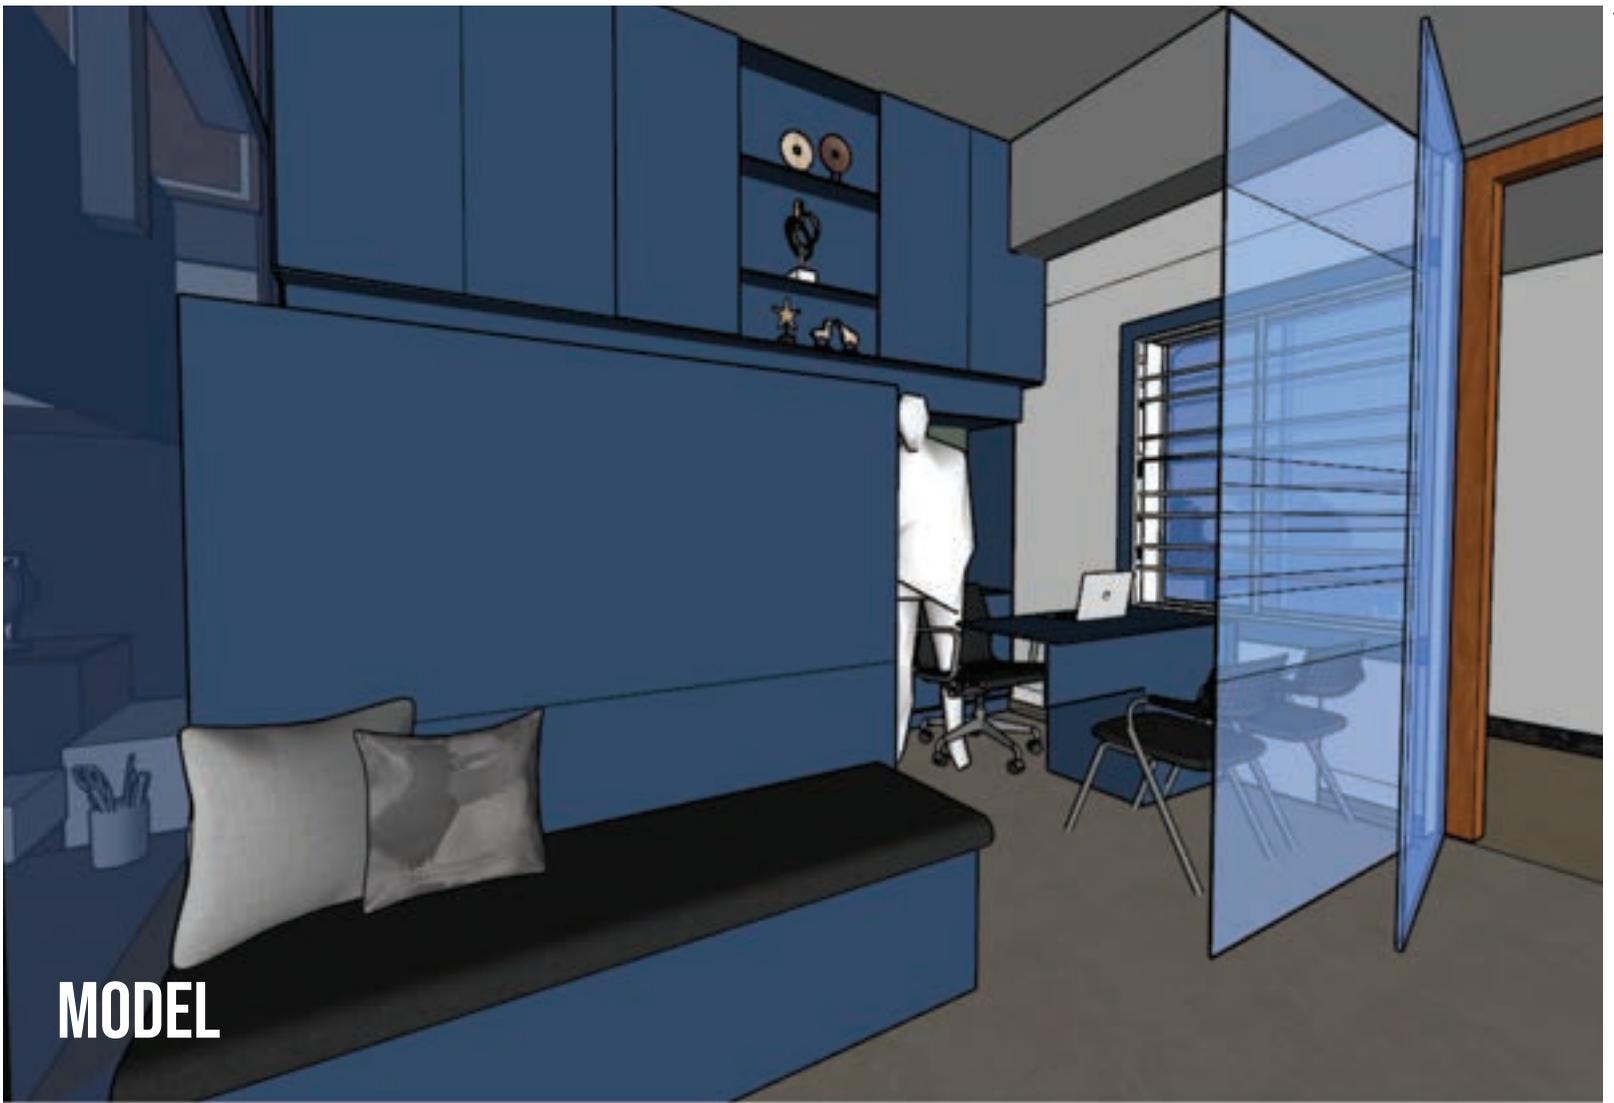

- A rhythm of seating positions that avoids visual clutter and promotes breathable spacing
- A central spine of circulation so teams move freely without interrupting ongoing work
- A balance of light zones ensuring every desk receives consistent illumination
- Vastu-sensitive planning, incorporating subtle directional harmony without altering modern efficiency
- Smart storage and minimal obstruction, keeping every workstation functional yet visually clean
- Hidden technology channels, allowing the space to feel neat, controlled, and future-friendly

Every angle is intentional. Nothing is decorative for the sake of decoration.

This is design that performs. *orem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud exerci tation*

## CLIENT TESTIMONIAL

### A Reflection of Trust, Collaboration, and Design Excellence

Every design journey reaches its most rewarding moment when the client feels truly connected to the space created for them. The office renovation project for TS Infomatic was more than just a transformation of walls and furniture it was about redefining how space supports people, productivity, and purpose.

After months of planning, designing, and execution, we were honored to hear how our client felt about their renewed workspace.

“When we first decided to renovate our office, our goal was simple, to create more space. But as the design process began, we realized it was about much more than expansion. Through thoughtful alignment, customized furniture, and intelligent spatial planning, the team transformed not just the layout but the way we work and connect within it.

What impressed me most was the conviction and creativity of the design team. I initially couldn't imagine accommodating fifteen people comfortably in this space, but today, everyone has more room than before both physically and mentally. The design allows our growing team to work efficiently while maintaining a sense of openness and warmth.

I truly appreciated how the designers respected my emotions and small details that mattered to me. There was an old almirah I was personally attached to, and I had almost given up on fitting it into the modern design. To my surprise, the team not only found a way to accommodate it but gave it a new life, blending sentiment with functionality beautifully. It made me feel heard, valued, and genuinely important in the process.

The renovation journey evolved naturally, with every decision taken thoughtfully from the acoustics to the lighting, from the clever use of vertical spaces to the calming aesthetic. Each corner reflects a balance between functionality and beauty.

Today, our workspace reflects our character. It's inviting, efficient, and personal. My team feels proud to work here, and I feel proud to invite guests and clients into this space a place that now tells our story. I find myself spending more time here, simply because it feels so good to be in it.

What began as a renovation has turned into a redefinition of how we work. I'm deeply satisfied with how everything turned out the vision, the execution, and the heart behind it all.”

SPATIAL FLOW  
CONSULTANT

# VASTERIOR

Every successful design is built on trust and shared vision.

We're grateful to Mr. Saurabh Singhal for allowing us to reimagine their workspace a transformation that celebrates efficiency, identity, and emotion in equal measure.

# 1612:

## *The Urban Envelope*

**PROJECT:** Luxury Compact Studio

**TYPE:** Residential Studio

**AREA:** 550-600 SQ. FT

**YEAR:** 2025

The 1612 Studio is designed as a compact, lifestyle-focused space that seamlessly brings together essential functions in a clear, well-organized layout. Warm tones, soft curves, layered lighting, and simple material choices create a calm, cohesive environment for everyday living. Thoughtful zoning ensures smooth movement, practicality, and comfort without overcrowding, maintaining visual balance and effortless usability throughout the day.

# PROJECT OVERVIEW

The 1612 Studio is designed as a compact yet thoughtfully planned living space that brings essential functions together within a calm, well-organized layout. Every element is carefully considered to balance comfort, utility, and visual clarity, ensuring the studio feels composed rather than crowded. Warm tones, clean material selections, and layered lighting work together to create a soft, grounded atmosphere that supports everyday living without overwhelming the room.

The layout is structured to allow smooth circulation and intuitive zoning, enabling the seating area, sleeping space, and functional zones to coexist seamlessly within a limited footprint. Subtle detailing, restrained material use, and thoughtful spatial planning ensure the studio remains efficient, adaptable, and easy to navigate. The design emphasizes clarity and comfort, allowing the space to function effortlessly throughout the day while maintaining a cohesive, balanced, and lived-in character.

## DESIGN INTENT

The studio is designed to feel calm and connected through warm tones, gentle curves, and minimal material combinations. Each area remains functional without breaking the overall visual flow.

## KEY HIGHLIGHTS

- Compact and cohesive space planning
- Soft arch for visual continuity
- Warm layered lighting across all zones
- POP ceiling panel for depth and balance
- Clean, functional kitchenette setup

## THE CHALLENGE

Designing a studio that remains open and comfortable without creating visual clutter or restricting movement within a compact footprint.

## THE SOLUTION

A combination of soft curves, warm tones, and minimal materials was used to keep the space visually light, while balanced lighting and clear zoning improved usability and comfort.

# OFFICE STUDIO:

*The Brass-Line Studio*

**PROJECT:** Corporate Meeting Room

**TYPE:** Meeting Room

**AREA:** Artisanal + Contemporary

**MATERIAL:** Sheesham Wood, Brass Accents, Warm Lighting

The Sheesham & Brass Boardroom is anchored by a handcrafted live-edge Sheesham table with subtle brass detailing, forming the emotional core of the space. Warm materials, layered lighting, and natural textures create a grounded, focused atmosphere—ideal for collaborative discussions and high-value conversations. A suspended wooden lighting beam, soft leather chairs, floating shelves, brass artefacts, and a clean presentation wall come together, shaping a cohesive workspace designed for comfort, clarity, and everyday use.

# PROJECT OVERVIEW

The Sheesham & Brass Boardroom is designed as a handcrafted meeting space that brings warmth, clarity, and modern functionality into a compact footprint. The live-edge Sheesham table acts as the visual and functional anchor, supported by soft leather seating, curated shelving, and layered lighting. Natural materials, subtle brass accents, and a clean presentation wall enhance focus and comfort, creating a calm, grounded environment suited for thoughtful discussions, collaborative decision-making, and everyday corporate use. Thoughtful spatial planning, acoustic balance, and understated detailing ensure the room feels composed yet inviting, supporting extended meetings, strategic conversations, and seamless collaboration without visual or sensory distraction. Every element is intentionally restrained, allowing the space to adapt effortlessly to both formal discussions and quieter, reflective exchanges.

## KEY HIGHLIGHTS

- Handcrafted live-edge Sheesham table with brass detailing
- Suspended wooden lighting beam for warm ambience
- Comfortable padded leather chairs
- Floating shelving with curated decor
- Presentation-ready TV wall with warm lamp lighting

## THE CHALLENGE

Designing a boardroom that feels warm and expressive without cluttering the compact layout or overwhelming the workspace.

## THE SOLUTION

A minimal palette of natural Sheesham wood, brass accents, and soft lighting kept the room visually calm. Balanced storage, curated artefacts, and ergonomic seating ensured day-to-day usability without compromising the handcrafted identity.

# INSPIRATION

*"Textures, colours, and spatial moods that guided the studio's visual narrative."*

# RENDER

# THE FINISHED NARRATIVE

*An idea, fully expressed through space.*

## SHELVING & ART DISPLAY

## HIGH TABLE & IDEATION CORNER

# BOARDROOM

*"A warm, connected living space designed for everyday comfort."*

SPATIAL FLOW  
CONSULTANT

# VASTERIOR

Through warm tones, grounded materials, and MahaVastu-aligned planning, Vasterior creates studios that move with purpose and breathe with clarity — a balance between function, flow, and quiet elegance.
